### 带式橄榄球俱乐部

Who doesn't like a game of tag, right? Why not improve your ball-handling, teamwork- and communication skills while doing so! Tag rugby is a fun, fast-moving, non-contact team sport designed for kids who love to test their speed, agility and hand-eye-coordination skills. Each player wears a Tag Belt with Velcro tags attached to them. Attacking players must dodge defenders who are attempting to 'tag' them by pulling the Velcro tag from the player with the ball. As a well experienced rugby player myself, you are guaranteed to learn lots of new skills and have tons of fun. I hope to see you there!

谁不喜欢追逐游戏，对吧？为什么不在这样做的同时提高你的控球、团队合作和沟通能力呢！带式橄榄球是一项有趣、快速移动、非接触式的团队运动，专为速度快、敏捷性高、手眼协调能力好的孩子设计。每位球员都佩戴一条带有魔术贴标签的标签带。进攻球员必须通过从带球球员身上拉魔术贴来躲避试图“盯住”他们的防守球员。作为一名经验丰富的橄榄球运动员，我保证你可以在这里学到很多新技能，并从中获得很多乐趣。希望可以在俱乐部见到你！

A lyrical dancer uses movement to express strong emotions such as love, joy and anger. Movements in lyrical dance are characterized by fluidity and grace, with the dancer flowing seamlessly from one move to another, holding finishing steps as long as possible. Leaps are exceptionally high and soaring, and turns are fluid and continuous. Any form of dance helps creativity and creative thinking, but especially so in this free form of dance. Lyrical dance will benefit all children regardless of age or ability. This class gives students a sense of empowerment and allows them to find their unique style. Lyrical dance develops poise, confidence, emotional stability, creativity and physical fitness.

## STEAM Engineering

### 创客工程

STEAM is a popular word that is often mentioned, but some parents and children may not fully understand what it means. STEM stands for science, technology, engineering and mathematics. When we talk about STEM skills, we're talking about the personal skills needed for science, math and engineering, and the skills needed to use technology effectively. This course allows children to think outside the box, find solutions to problems through experiment, trial and error, and put into practice many of the skills they gain as they grow up. Here, you can use your imagination and creativity, work together, and complete your work in multiple trials. The key to your activities and experiences is the ability to think, discover, implement, think again, discover again, and solve again.

STEAM 是一个经常被提及的流行词汇，但是一些父母和孩子可能并不完全理解它的意思。STEAM 是科学、技术、工程、艺术和数学的缩写。创客工程课让孩子们有机会追随自己的激情，持续追问“为什么？”“寻找答案，亲自设计、绘制、建造创造、解决问题、最重要的是：孩子们会玩得开心。本课程鼓励创新、解决问题和合作。它让孩子们跳出思维定形的框框，通过实验、尝试和错误找到问题的解决方案，同时把他们在成长过程中获得的许多技能付诸实践。最重要的是，孩子们能确保专注于“做”。选择一个可以让孩子们自己参与活动的班级。经常会有团队合作，孩子们成对或小组合作。这允许孩子们发展交流技巧，轮流，结交新朋友，学会妥协和分享想法。确保活动的设计是有趣和吸引人的。无论你的孩子参加什么类型的课外活动，他们都应该对他们所学到的充满热情地离开课堂！孩子需要探索和发现。这是创新的过程；在失败中寻找答案。“科学家总是失败；我们只是用不同的方式进行记录。我们称之为‘数据’。（艾妮萨·拉米雷斯美国材料科学家和科学传播者）

## Aikido Club

### 合气道

Aikido is a modern Japanese martial art. Aikido is now practiced in around 140 countries. It was originally developed by Ueshiba Morihei, as a synthesis of his martial studies, philosophy and religious beliefs. Ueshiba's goal was to create an art that practitioners could use to defend themselves while also protecting their attackers from injury. Aikido is often translated as "the way of unifying (with) life energy" or as "the way of harmonious spirit". According to the founder's philosophy, the primary goal in the practice of aikido is to overcome oneself instead of cultivating violence or aggressiveness. Aikido's fundamental principles include: irimi(entering), atemi,kokyu-ho (breathing control), sankaku-ho (triangular principle) and tenkan (turning) movements that redirect the opponent's attack momentum. Its curriculum comprises various techniques, primarily throws and joint locks.It also includes a weapons system encompassing the bokken, tantō and jō.

## Archaeology Adventure Club

### 考古探险俱乐部

Archaeology is about research into the past and the unknown. I think it's just human instinct to be curious about what happened in the past. This club is for the MS/HS students. It focuses on archaeology and museums, and it helps the students to think like an archaeologist, to explore the unknown and to satisfy their curiosity. For this season, I have chosen as the theme the most frequently asked questions by my students during the past 10 years, such as "Have you ever been to an ancient tomb? Do ghosts really exist? , or like, " Why is the imperial palace called the purple forbidden city? Who designed it? Does the architecture involve Fengshui? Why could the construction be completed so soon?", or, " what does an archaeologist do? Why do foreigners not recognize Xia dynasty? Did it really exist? What happened?" Through this season you will acquire: 100,000 Whys and Answers, with perhaps extra Whys; How archaeologists think and the logic of archaeology; Knowledge of some interesting cultural relics and how to appreciate and describe them; How to properly visit museums and try to make use of its resources. In this season, let's delve into archaeology and explore together! We will solve 100,000 Whys!
